

Patriot Act Throughlines

WSC Colloquium: 9/11s

Nick Zufelt, Nov 10 2021

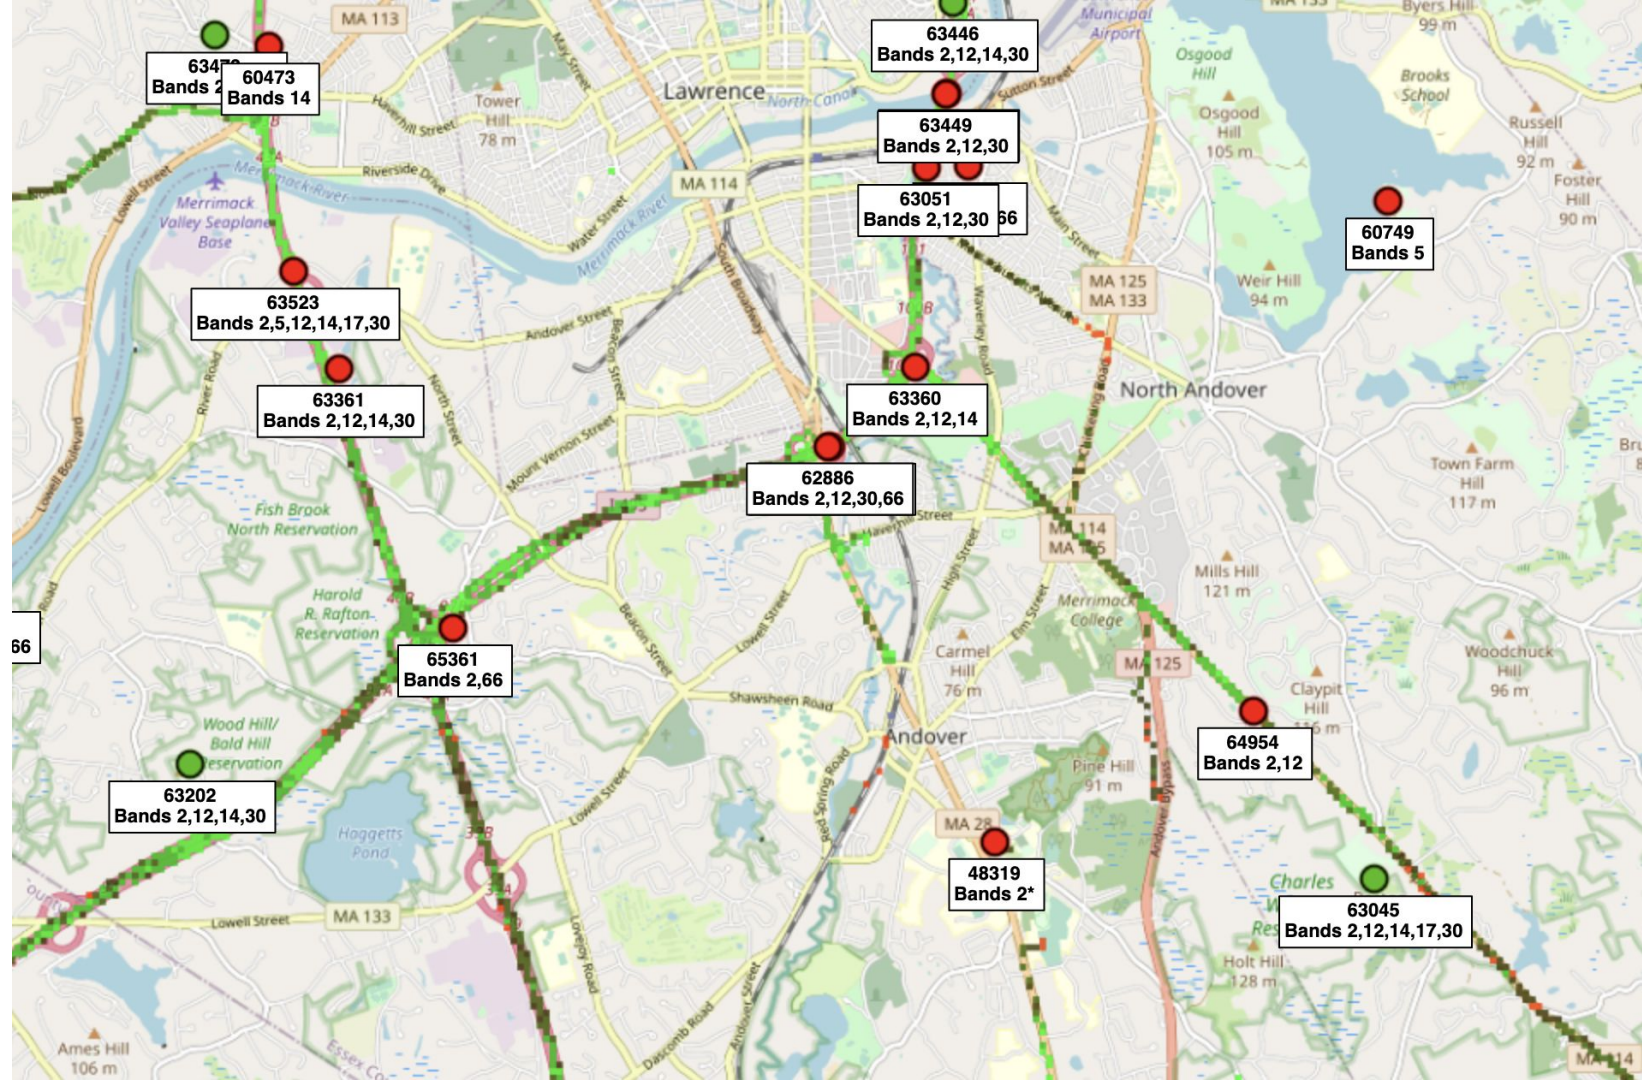

1. Who has access to your public-facing social media profiles? Who doesn't?
2. How many cameras are present on Andover's campus (Take a guess!)? What is their purpose?

Missouri Gov. Mike Parson wants to prosecute a journalist who warned the state that a government website left school teachers and administrators' Social Security numbers exposed.

Parson called *St. Louis Post-Dispatch* reporter Josh Renaud a “hacker” and vowed to seek criminal prosecution at a press conference on Thursday. Renaud's "crime?" Clicking "view source" on a publicly available webpage.

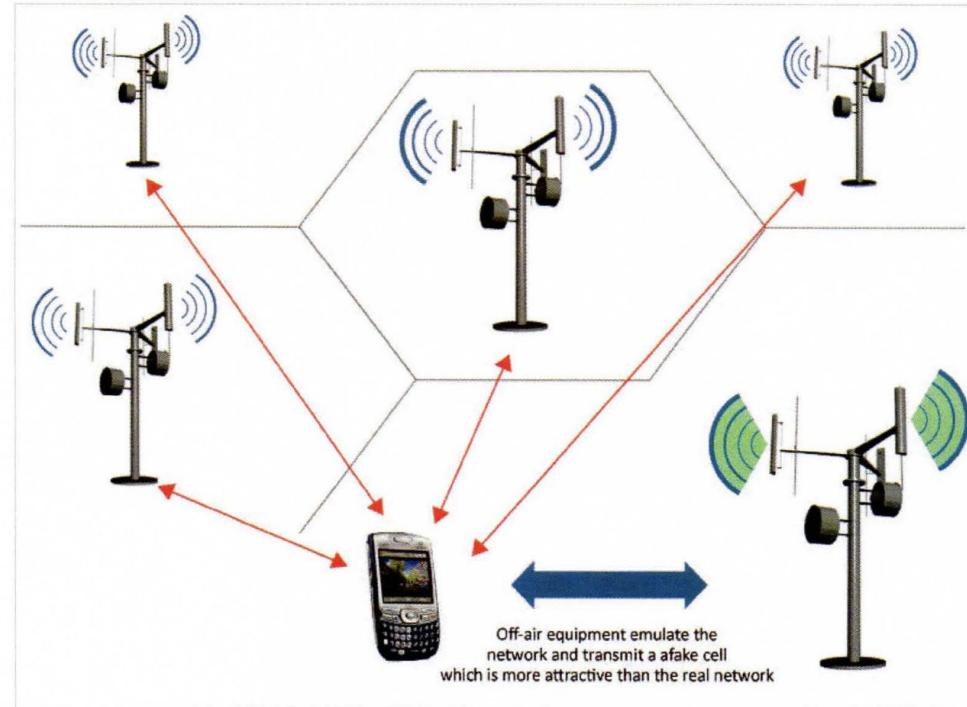

“The state does not take this matter lightly,” Parson said, according to the Missouri Independent. “This administration is standing up against any and all perpetrators who attempt to steal personal information and harm Missourians.” |

A St. Louis Post-Dispatch journalist found 100,000 Social Security numbers exposed in a government website, and reported the flaw to the government.

Working off-air, solutions today take advantage of the requirement for the cell-phone to continually search for the strongest valid network cell. Emulating a valid network cell they will transmit a more attractive signal to attract cell-phones to join. The process of joining results in the cell-phone providing its unique IMSI & IMEI details.

Now Law Enforcement Agencies can target specific cell-phones to covertly obtain their details. It is relatively straightforward within GSM networks to obtain the IMSI & IMEI providing the correct cell is emulated. A cell-phone only actively monitors the 6 strongest neighboring cells. To grab Target(s) requires emulating one of these neighbor cells. Solutions today will aid users in this cell selection process.

help!

Aurora PD Announces Package Theft Prevention Initiative

Aurora, CO – This week, the Aurora Police Department in partnership with the United States Postal Service (USPS) conducted a comprehensive, community based prevention initiative focused on package theft. The goal of the initiative was to provide ongoing prevention, protection, and enforcement activities related to package and mail theft. Amazon and Ring also assisted with the operation. Officers placed several packages throughout Aurora in order to seek out potential package thieves. The decoy packages used in the operation contained trackers that could be used to track the various packages if they were stolen.

Although the initiative resulted in zero arrests today, the Aurora Police Department will continue to run similar operations throughout this holiday season.

If you are the victim of a package theft or would like to file a report, you can:

- Call Dispatch: 303-627-3300
- Report online at:
https://www.aurora.gov/residents/public_safety/police/make_an_online_report

Contributing Agencies & Partners:

The Aurora Police Department, USPS, Ring and Amazon.

The Secretive Company That Might End Privacy as We Know It

A little-known start-up helps law enforcement match photos of unknown people to their online images — and “might lead to a dystopian future or something,” a backer says.

Zoom iOS App Sends Data to Facebook Even if You Don't Have a Facebook Account

Zoom's privacy policy isn't explicit about the data transfer to Facebook at all.

By [Joseph Cox](#)

ephemerality of videos and photos users send to one another. Users may not be aware of the sort of data that Snapchat can store, however. In 2014, the **Federal Trade Commission fined Snapchat** for failing to disclose that the company collected, stored, and transmitted geolocation data.

help with customer reports, comply with laws, and to enforce the network's terms and policies, employees have used data access processes for illegitimate reasons to spy on users, according to two former employees.

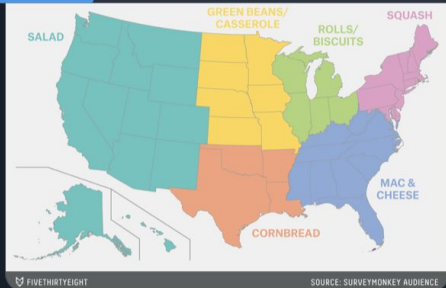

“How do you sustain a business model in which users don’t pay for your service?” Sen. Orrin Hatch (R-UT) asked Zuckerberg early on in the hearing.

“Senator, we run ads,” Zuckerberg replied.
